State of Rhode Island Hurricane Evacuation Routes Town of Little Compton January 2006

Map Notes:
Evacuation Routes, Traffic Control Points, and Sign Locations were developed as part of an effort lead by Rhode Island Emergency Management in coordination with the Rhode Island Department of Transportation during 2004 - 2005. The data was submitted to the State to input into a Statewide GIS database. Each community was responsible for reviewing and approving their respective information. By January 2006, all evacuation routes, traffic control points, and sign locations were finalized by each participating Rhode Island coastal city and town.

The Shaded land areas are recommended to be evacuated prior to a hurricane due to potential surge flooding from hurricanes of "worst case" meteorological conditions. Inland areas which may be exposed to fresh water flooding only are not included within evacuation zones.

Hurricane categories 1 through 4 refer to the Saffir-Simpson scale of hurricane intensity.

Displayed shelters are Red Cross approved only. Contact local officials regarding any additional city or town provided shelters.
